i2 Analyst's Notebook

i2® Analyst's Notebook® - is an advanced visual analysis software tool designed to support analysts in their investigations to combat criminal activities.
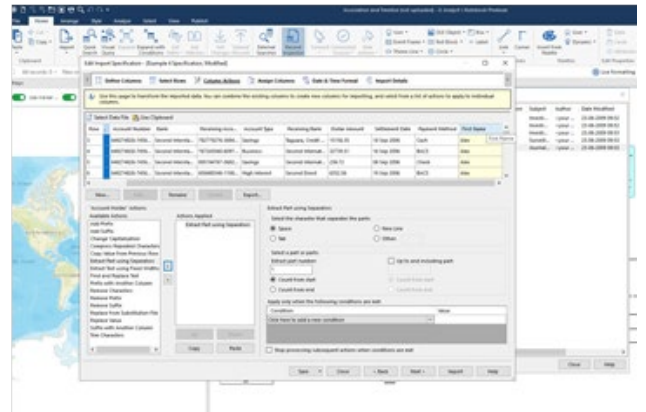

Highlights:

- Reduce the time to deliver rich, actionable intelligence from complex sets of disparate data
- Identify connections, patterns, and key intelligence that might otherwise be missed
- Increase understanding of complex criminal, terrorist, and fraudulent networks
- Clearly communicate findings by simplifying the presentation of complex information
- Build a single cohesive intelligence picture to enable more informed and effective operational decision making

Flexible data acquisition

i2® Analyst's Notebook® provides a range of tools to quickly acquire the wide variety of information that intelligence analysts regularly need to manage. This flexible approach to data acquisition enables users to input a broad range of data types, such as call records, financial transactions, IP logs, and mobile forensics data.

- Rapidly import structured data in an analysis-ready form with a wizard-style visual importer.
- Simplify the manual data entry process with an intuitive drag and drop data input mode.
- Connect to and query available data sources via numerous data acquisition extensibility options.

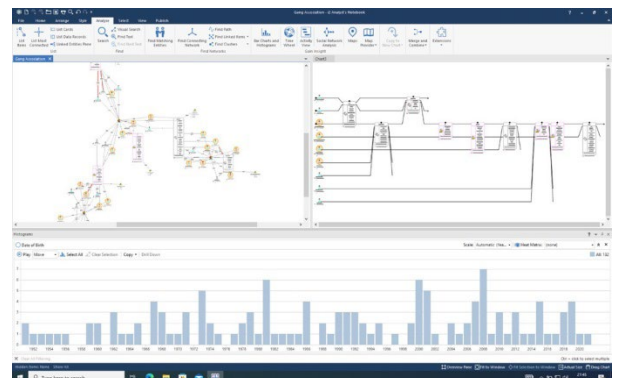

Model data to support the investigation

The flexibility of i2® Analyst's Notebook® for managing data provides users with the freedom to utilize complex relational data.

With i2® Analyst's Notebook®,users have the flexibility to model and visualize data ina way that best suits their analysis.

- Quickly turn data into easily understandable visualizations to aid the analysis of complex scenarios.
- Represent information to best suit the data to be analyzed with extensive network and temporal options.
- Perform both analysis and intelligence production tasks within a single environment.
-

Powerful analysis that reveals insights

i2® Analyst's Notebook® provides a wide range of analysis capabilities. The extensive analysis environment enables users to quickly gain an understanding of the data and pinpoint key intelligence. Analysis tools include the ability to

create multiple views on data of interest: association, temporal, spatial, statistical, and spreadsheet views.

These multiple views help to give a better understanding of the important who, what, where, when and why aspects of the data.

These capabilities can help analysts to quickly analyze complex data sets and enables users to:

- Quickly highlight key individuals and relationships and their connections to key events with core link analysis capabilities.
- Understand the critical timeline of events or patterns within criminal activities with powerful temporal analysis tools.
- Gain better insight and understanding of the structure, hierarchy and operations of complex networks with integrated Social Network Analysis tools.
- Identify potential important intermediaries between seemingly unconnected entities in a network.
- Instantly highlight potentially key information in communications and transactional data.
- Combine association, temporal and geospatial aspects of data with multi-dimensional analysis views.

Communicate complex data

i2® Analyst's Notebook® allows users to communicate complex data with intuitive and easy-to-follow visual briefing charts

- Communicate complex data with intuitive and easy-to-follow visual briefing charts.
- Create detailed charts and visualizations to enhance other intelligence products.
- Produce redacted versions of charts to easily share the right level of information to others with differing security clearances.
- Share charts with non-Analyst's Notebook users with the freely available i2® Chart Reader
